TECHNICAL SPECIFICATIONS - SEWER DEPARTMENT

The following is the scope of services that the MSD requires.

- All analytical data required, shall be completed in accordance with the provided EPA approved methods for regulatory reporting of the appropriate sections for wastewater by an approved laboratory, certified by the State of Connecticut. Other approved methodologies are only acceptable with MSD approval.
- Laboratories must have the capability to perform all indicated testing in house, unless otherwise approved by the MSD. The MSD may select upon the Labs internal capabilities.
- The MSD reserves the right to audit and or inspect the laboratory for QA/QC purposes through the term of the contract. Selection will be awarded only after a satisfactory QA/QC DMRQA audit is demonstrated for listed analytes.
- All data is to be furnished in a prepared format for regulatory reporting. Reportable data must be in the order presented within the provided tables and sample plan for the Sewer Department. The Laboratory must be capable of providing electronic mail service.
- The MSD's sample plan/chain of custody will be utilized for all sample transmission.
- All fecal coliform analysis for waste-water will be reported to the MSD within 24 hours of completion. The protocol will consist of verbal communication, facsimile transmittal or Email.
- Analytical data for BOD and Fecal Coliform is to be returned in one day, except where otherwise noted, and approved by the MSD. All other analysis is to be returned in within seven days.
- The MSD reserves the right to analyze in house, or sole source any analytical procedures for the convenience of the Wastewater Department.
- Sampling, preservation, and collection will be handled by the appropriate Wastewater personnel in containers furnished by the contract laboratory. Samples collected shall be made available to the contract laboratory for pick up at locations within the City of Middletown, to be designated by the MSD. The selected laboratory will be responsible for picking up samples, and scheduled regulatory sample plans.
- Responding Laboratories are expected to provide consultation with expertise for a wide variety of analytical questions ranging from chemical, biological, microbiological, biochemical, inorganic and organic analysis. The format may range from process control for water, or wastewater activities to groundwater protection criteria, industrial pretreatment, and pollution issues. The MSD requires detailed summaries for analysis with interpretation of findings, and additional information on analytes when required. Responding labs must submit their personnel's credentials for this purpose. These will be considered in the selection process.
- All stated quantities are minimums and should only be regarded as estimates for cost work up, actual quantities may vary. Quantities are based on a two year contract.
